

Python Loop Practice - Answer Key

1. Print all numbers from 1 to 50 using a for loop.

```
for i in range(1, 51):  
    print(i)
```

2. Print all even numbers between 1 and 100.

```
for i in range(1, 101):  
    if i % 2 == 0:  
        print(i)
```

3. Print all odd numbers between 1 and 100.

```
for i in range(1, 101):  
    if i % 2 != 0:  
        print(i)
```

4. Print the square of numbers from 1 to 10.

```
for i in range(1, 11):  
    print(i, "=>", i*i)
```

5. Find the sum of numbers from 1 to 100.

```
total = 0  
for i in range(1, 101):  
    total += i  
print("Sum:", total)
```

6. Print numbers from a list: [10, 20, 30, 40, 50].

```
numbers = [10, 20, 30, 40, 50]  
for num in numbers:  
    print(num)
```

7. Count how many numbers are greater than 25 in a list.

```
numbers = [10, 30, 20, 40, 15]  
count = 0  
for num in numbers:  
    if num > 25:  
        count += 1  
print("Count:", count)
```

8. Find the smallest number in a list.

```
numbers = [8, 3, 15, 2, 9]  
smallest = numbers[0]
```

```
for num in numbers:
    if num < smallest:
        smallest = num

print("Smallest:", smallest)
```

9. Print multiplication table of any number given by user input.

```
num = int(input("Enter a number: "))
for i in range(1, 11):
    print(num, "x", i, "=", num*i)
```

10. Reverse a list using a loop.

```
numbers = [1, 2, 3, 4, 5]
reversed_list = []

for i in range(len(numbers)-1, -1, -1):
    reversed_list.append(numbers[i])

print("Reversed:", reversed_list)
```

11. Print each character of a string using a loop.

```
text = "Python"
for ch in text:
    print(ch)
```

12. Count vowels in a string using a loop.

```
text = "Python Programming"
vowels = "aeiouAEIOU"
count = 0

for ch in text:
    if ch in vowels:
        count += 1

print("Vowel count:", count)
```

13. Print numbers from 1 to 10 but stop if number is 5 (use break).

```
for i in range(1, 11):
    if i == 5:
        break
    print(i)
```

14. Print numbers from 1 to 10 but skip 5 (use continue).

```
for i in range(1, 11):  
    if i == 5:  
        continue  
    print(i)
```

15. Create a pattern using loop.

```
for i in range(1, 6):  
    for j in range(i):  
        print("*", end="")  
    print()
```
